

IPKarting presents the new Praga Limited Edition

IPKarting's renewed Praga Kart models are available and ready to hit the track. The most evident differences compared to the standard production consist in aesthetics and certain technical features regarding a **limited edition of 150 chassis**, which feature **special graphics** to recall Praga's origins. In fact, the peculiar logo that characterises this exceptional series was one of the options at the time of the **company's foundation early in 20th century when Praga company was established and rapidly grew. Praga was one of the biggest manufacturers not just in middle Europe, producing cars, motorbikes, trucks, buses, aircrafts, and other multiple products.** Despite opting for another logo version, the **sketches of this alternative one** remained intact over the years and IPKarting was allowed by Praga to use opportunity and pay tribute to Praga's magnificent history. Therefore, **the logo that was sketched more than a century ago and never used since that then**, has been modernised to mark an important step in the Praga Kart brand's journey with a one-off edition of 150 chassis and limited edition of race suits, t-shirts, and hoodies.

Daniel Slíva, IPK CEO said: "After 14 years of Praga success in the kart industry, I'm proud to introduce this limited edition, and I'm sure it will be highly appreciated by our customers".

The design of clothing items, such as t-shirts, hoodies and driver suits is **characterized by the Praga logo in limited edition** and the choice of the combination of colors of the brand that makes the most modern style with neat lines.

The t-shirts and hoodies of this series have an excellent fit, consists of a high-tech fabric, durable, breathable and lightweight, so it allows sweat to evaporate through the fabric, leaving the skin relatively dry and odorless and so also the fabric.
